Working Holistically On Legal Evolution

WHOLE supports BEING NATURE
a European Citizens Initiative for recognising
and respecting the inherent rights of nature.

The new paradigm of emerging environmental law reflects the will of the people to embrace a more authentic relationship with the living planet – from power over to power with.

Saturday 25th and Sunday 26th January 2014

This workshop is for people who

- campaign on behalf of nature within government, communities, businesses, non-profits and law firms.
- wish to contribute to the development of rights of nature laws within the EU.
- want to experience systemic constellations* applied to cases involving law and the environment.

Our intention is to facilitate break-through in live issues and to familiarise participants with a whole system approach to meeting resistance.

To book your place, contact Mumta Ito:
info@wholistic-law.org

Workshop Price: In the spirit of evolving economy; we will make our costs transparent and ask you to attune to your contribution .

Venue: 12A Fyrish Road Findhorn, Scotland, IV36 3YT
Time: 9.30- 5pm Saturday, 9.30-4pm Sunday

*Participant numbers limited.
Please book soon to avoid disappointment.*

Workshop facilitators:

Mumta Ito is the founder of the International Centre for Wholistic Law and initiator of the BEING NATURE project. A former City lawyer, she has toured extensively with Amma, one of India's foremost spiritual teachers. Mumta has co-facilitated healing workshops world-wide and set up a Caribbean NGO saving an island of global ecological importance.

Lucy Thomas is a systemic practitioner who facilitates whole system healing with groups and individuals of diverse needs. Her skills include an ability to identify the hidden connections between seemingly separate aspects of our experience. Scotland is her adopted home. She cherishes its wildness.

***systemic constellations**, based on the work of Bert Hellinger, allow us to create a spatial map of hidden dynamics and to shift them through directly accessing the morphogenetic field.

"We need wholistic law now. Unless we recognise the rights of Earth, the rights of humans cannot be sustained. I'm full of admiration and support for your work. It is timely." **Satish Kumar**

"After the workshop I could see that the energy company was simply a part of a wider systemic picture – and what we are really up against is ourselves. My consciousness has expanded, I am now aware of the need to work on multiple levels." **Jamie McKenzie** (Falkirk anti-fracking campaigner)
