AGENDA

Friday, May 16

Morning: 9.30 – 12.30 h. 'De School', the most innovative primary school in The Netherlands, recognized and regular paid for by the government. A School, organized like a sociocratic business, open from 8 till 6 h., and 50 weeks a year. You will be astonished by the effect of the sociocratic participation and involvement of the children and their parents. *Lunch on the beach.*

Afternoon: 14.00 – 17.00 h. 'Fabrique', a design and communication business with three locations in The Netherlands. We are welcome at their location in the Center of Amsterdam. They have made the website of the Rijksmuseum www.Rijksmuseum.nl and of Dutch Ahold, Albert Heijn, www.ah.nl. Fabrique uses Sociocracy, because they feel the traditional working method doesn't line up with their working together with young experts. *Both locations are easy to reach by train and 10-minute walk from the railway station.*

Saturday, May 17:

The forum will be organized in an open space format:

- Case presentations by the consultants for the two companies visited on Friday; other case presentations.
- Presentations about training methods
- Talks on new developments, e.g., validation by the Dutch government of sociocratic organizations.
- Spontaneous gatherings to talk and learn from each other.
- Collaboratively developing your next steps.
